CURE OF ALL DISEASES ARISING FROM AN IMPURE STATE OF THE BLOOD, OR HABIT OF THE SYSTEM.

The value of this Medicine is 'ow widely known, and very day the field of its uprfumess is extended. It is anproved and highly recommended by Physicians and admit-ted to be the most powe, ful and searching preparation from he root that has ever been employed in medical practice. Its operation extends to the remotest parts of the system, and consists in removing diseased action in the absorbing and secreting organs. In man, Nature seldom effects, unassisted, the cure of any virulent disease, but requires the aid of a stimulent, alterative, or antiseptic medicine. In diseases of the skin and flesh, a combination of these three asses of medical agents is highly desirable. All these properties are combined in this preparation: and instead of operating successively upon the system as they must neneously and in perfect harmony when administered in this orm. Its tonic property strengthens digestion and improves the appetite.—Its alterative tendency carries off the accumulations of morbid matter—and its antiseptic in-fluence neutralizes the virus, by which the disease is fosered. Its uniform success in curing and relieving the vaious diseases for which it is recommended, is established
